PROFESSIONAL SUMMARY

- Aspiring Business Analyst and Computer Science Engineering graduate with a specialization in AI/ML. Practical experience in business process analysis, requirement gathering, Python automation, web development, and business intelligence tools. Skilled in workflow optimization, documentation, dashboarding, and building data-driven solutions through internships and projects. Hands-on exposure to Excel, Power BI, Power Apps, and MS SQL for reporting, workflow automation, and decision support. Smart India Hackathon 2024 Finalist with strong analytical thinking, stakeholder understanding, and problem-solving capabilities.

TECHNICAL SKILLS

- Business Analysis:** Requirement Gathering, Process Analysis, Workflow Optimization, Documentation, Strategic Planning, Stakeholder Communication
- Data Analytics & Tools:** Excel, Power BI, Power Apps, MS SQL, Data Reporting, Dashboard Development, Workflow Automation
- Programming Languages:** Python, MongoDB, HTML, CSS, JavaScript, Django, Node.js
- Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

WORK EXPERIENCE

Business Analyst Intern | Unite Computech Info (UCI)

Jul, 2026 – April, 2026

- Analyzed business workflows and operational processes to identify efficiency gaps, optimization opportunities, and strategic improvements.
- Worked hands-on with Excel, Power BI, Power Apps, and MS SQL for data analysis, reporting, workflow automation, and business process documentation.
- Built reports, supported dashboard creation, and assisted in translating business requirements into data-driven insights for decision-making.
- Supported requirement gathering, stakeholder communication, workflow evaluation, and process improvement recommendations.

Web Developer Intern | Prodigy Infotech

Dec, 2024 – Jan, 2025

- Developed responsive web solutions while aligning technical implementation with project requirements and execution workflows.
- Strengthened understanding of project lifecycle, structured development, and deadline management.

Python Intern | Hackveda Limited

Dec, 2023 – Jan, 2024

- Built automation tools including SMTP Email Sender, Web Crawler, and Stock Screener using Python.
- Enhanced analytical thinking, debugging, automation, and structured software development capabilities.

PROJECTS

KrishiSarth – A Contract Farming Platform | Firebase, Web Scrapping

- KrishiSarth is a web-based application designed to empower Indian farmers through a secure and transparent contract farming and bidding platform. The platform connects farmers directly with buyers and retailers, helping them get better prices and reducing middlemen interference.
- Key Features:** (i) Bidding System: Farmers can list their crops with a base price, and buyers can place competitive bids within a defined time window. (ii) Live Market Rates: Integrated with APMC APIs to display real-time crop prices for better decision-making. (iii) KYC Verification: Ensures trusted and verified users (both farmers and buyers). User-Friendly Interface: Accessible and easy to use for rural and semi-urban users
- Objective:** To promote fair trade practices in agriculture and increase farmers' income through digital solutions and direct buyerfarmer interaction

Smart Inventory Management System | Python, Database Systems

- Designed an inventory optimization solution for small businesses with demand forecasting, stock alerts, operational reporting, and workflow improvement.
- Focused on improving inventory visibility, business efficiency, and decision-making through data-driven recommendations.

E-Commerce Website | Django, HTML, CSS, JavaScript

- Developed a full stack e-commerce platform with authentication, product catalog, and transaction workflows.
- Demonstrated understanding of customer journey, digital business systems, and operational structure.

ReByte – E-Waste Management Solution | Digital Process Innovation

- Built a sustainability-focused solution addressing e-waste management through digital process innovation.
- Focused on scalable problem-solving, social impact, and operational improvement.

AWARDS & ACHIEVEMENTS

- **Smart India Hackathon 2024 Finalist** – Top 5 teams nationally for SIH1640 among 500+ teams
- **NPTEL Gold Medalist** – Human Computer Interaction (94%) IIT Madras Responsible & Safe AI Certification
- **ELITE Certified (NPTEL)**

EDUCATION

GSFC UNIVERSITY

2022–2026

Completed Bachelor of Technology in Computer Science & Engineering (AI/ML) with an aggregate of 7.70 cgpa.

OTHER SKILLS

- Team Management, Leadership, Cross-functional Collaboration, Communication, Problem Solving & Decision Making
